

MS-700 - Microsoft 365 Certified: Managing Microsoft Teams

This course composed of 4 days modules is designed for IT Professionals who manage and deploy security technologies for Microsoft 365 in their organization.

These courses help learners prepare for the « Microsoft 365 Certified: Security Administrator Associate exam (MS-500) ».

Overview

This course of 4 days is designed for IT Professionals who will learn how to plan, configure, and manage SharePoint Site Collection and OneDrive for Business to enable modern content services which transform the content lifecycle.

In this course, you will learn how to manage Microsoft Teams in your organizations. The course covers Microsoft Teams overview, implementing governance, security and compliance for Microsoft Teams, preparing the environment for a Microsoft Teams deployment, deploying teams, and managing collaboration and communication in Microsoft Teams. You will learn about Teams architecture. Specifically, you will learn about the integration between Microsoft Teams and various workloads and services in Microsoft 365. You will learn about security and compliance features for Teams, including conditional access, MFA, Threat, alerts, DLP policies, eDiscovery, and information barrier policies. You will also learn about preparing the environment for a Microsoft Teams deployment, including upgrading from Skype for Business to Microsoft Teams, network settings, and managing Microsoft Teams endpoints. Lastly, you will learn about how to create and manage teams, manage membership, including internal and external users. You will further learn about different settings and policies to manage collaboration and communication experiences in Microsoft Teams.

This course helps prepare for the exam « MS-700: Managing Microsoft Teamwork » to obtain the title « Microsoft 365 Certified: Teamwork Administrator Associate ».

Target Audience

This course is designed for persons who are aspiring to the Microsoft 365 Teams Admin role and are interested in passing the Microsoft Teams Administrator Associate certification exam. The Microsoft Teams Administrator configures, deploys, and manages Office 365 workloads for Microsoft Teams that focus on efficient and effective collaboration and communication in an enterprise environment. The Teams Administrator collaborates with Telephony engineers to integrate advanced voice features into Microsoft Teams. This role is not responsible for configuring direct routing, configuring call routing, or integrating telephony.
