1. Microsoft 365 Fundamentals (Course MS-900)

Overview

This course provides foundational knowledge on the considerations and benefits of adopting cloud services and the Software as a Service (SaaS) cloud model, with a specific focus on Microsoft 365 cloud service offerings. You will begin by learning about cloud fundamentals, including an overview of cloud computing and specifically Microsoft cloud services. You will be introduced to Microsoft Azure, and you will examine the differences between Microsoft 365 and Office 365. You will then perform an in-depth review of Microsoft 365, including a comparison of Microsoft on-premises services versus Microsoft 365 cloud services, a review of enterprise mobility in Microsoft 365, and an analysis of how Microsoft 365 services provide collaboration. The course then analyzes how security, compliance, privacy, and trust are handled in Microsoft 365, and it concludes with a review of Microsoft 365 subscriptions, licenses, billing, and support.

This course helps learners prepare for the Microsoft 365 Certified: Microsoft 365 Fundamentals exam (MS-900).

Targuet Audience :

This course is designed for IT Professionals who aspire to deploy and manage cloud services in their organization, or who are simply looking to acquire foundational knowledge on cloud fundamentals. This includes the considerations and benefits of adopting cloud services in general and the Software as a Service (SaaS) cloud model specifically, with a general focus on Microsoft 365 cloud service offerings.

Objectives :

After completing this course, students will be able to:

- differentiate between the various cloud service models.
- identify the key differences between Microsoft 365 and Office 365.
- plan for migration to Microsoft 365 services.
- identify key differences between Microsoft on-premises services and Microsoft 365 cloud services.
- define enterprise mobility in Microsoft 365.
- identify how Microsoft 365 services support teamwork.
- describe identities, including cloud, on-premises, and hybrid identity.
- describe cloud device management and protection, including the use of Intune.

- describe data protection, including the use of Azure Information Protection.
- describe compliance in general and the compliance features in Microsoft 365.
- describe Microsoft 365 subscriptions, licenses, billing, and support.

Prerequisites :

Before attending this course, students should have the following background:

- general IT knowledge or any general experience working in an IT environment
- general (sales level) experience on corresponding Microsoft on-premises products, such as Exchange Server, SharePoint, Office Professional, AD RMS and others
- experience addressing business/legal/security requirements for IT.
